Migration brief: Cloudflare Zone Settings Batch API

Prepared 2026-11-05 - sourced facts, verify with the linked announcement.

Shutdown date: `2027-03-31` (146 days left)
Export deadline: `unverified`
Official announcement:
https://developers.cloudflare.com/fundamentals/api/reference/deprecations/

What stops working

Cloudflare lists the Zone Settings Batch API endpoints as deprecated with an end-of-life date of 2027-03-31 (the deprecations page states the date was extended to 2027-03-31; first listed 2026-07-27).

Data at risk

Requests to the batch endpoints stop working at end of life; use the per-setting endpoints instead, as Cloudflare states.

Documented migration options

- Per-setting Zone Settings endpoints (Cloudflare's stated replacement)

Action checklist

1. Export data before the deadline (TBD)
2. Pick a replacement and run parallel for one cycle
3. Update runbooks, integrations and billing
